EDUCATION

ASSOCIATE OF ARTS IN COMPUTER SCIENCE

PENSACOLA STATE COLLEGE —
PENSACOLA, FL | AUGUST 2022

BACHELOR OF SCIENCE IN COMPUTER SCIENCE (IN PROGRESS)

University of Texas at Arlington —
Arlington, TX

KEY SKILLS

Cloud & DevOps: AWS (S3, CloudWatch Logs), Production Monitoring, Incident Response

Programming: C, C++, Python, SQL

Game Development: Unreal Engine 5, Blueprints, UMG, Gameplay Systems

Operating Systems: Windows (Primary), AWS Cloud Environments, Linux (Ubuntu — learning in progress)

Tools & Systems: Git, Backend System Integration, Log Analysis

PROFILE

Software developer and game development enthusiast with professional experience supporting cloud-based production systems, troubleshooting complex technical issues, and building gameplay systems in Unreal Engine 5. Skilled in debugging, root cause analysis, AWS infrastructure, SQL, and system design. Currently developing Graveyard Shift, a solo Unreal Engine 5 project featuring gameplay, dialogue, progression, and task management systems.

EXPERIENCE

PRODUCTION SUPPORT ANALYST

FORTIS PAYMENT SOLUTIONS — DALLAS, TEXAS | MARCH 2025 – PRESENT

- Monitored cloud-based production systems using AWS CloudWatch and S3, diagnosing service disruptions and application failures.
- Conducted log analysis and database research to identify root causes and resolve production issues.
- Managed incident response workflows, coordinating triage, escalation, and resolution of live production problems.
- Validated financial reporting data and agent residual calculations to ensure accuracy and compliance.

TECHNICAL OPERATIONS SPECIALIST

FORTIS PAYMENT SOLUTIONS — DALLAS, TX | APRIL 2024– MARCH 2025

- Supported payment processing integrations and backend service operations within a production environment.
- Investigated and resolved software and connectivity issues impacting transaction workflows and system reliability.

PROJECTS

Graveyard Shift (Unreal Engine 5) | Solo Developer

- Developed a gameplay interaction framework supporting Tap, Hold, and Talk interactions using Blueprint Interfaces.
- Designed and implemented a Chore Manager system to assign, track, and validate daily gameplay objectives.
- Implemented randomized spawning systems for trash, weeds, and grave maintenance tasks.
- Built a dialogue system using UMG widgets, NPC interactions, and multi-line dialogue progression.
- Developed progression systems including chore completion tracking, rewards, and daily workflow management.
